Fred Krampits, Chair
Frank Laflamme, Vice Chair
Shane Brooks
Gary Labrie
Adam Lamontagne

Approved

**MINUTES
January 10, 2017**

The following are the minutes of a public hearing held Tuesday, January 10, 2017 at 6:45. PM in the City Council Chambers, Fourth Floor, City Hall Annex, 274 Front Street, Chicopee, MA 01013.

Members Present

Krampits, Laflamme, Brooks, Labrie, Lamontagne

Also Present

Dan Garvey (Associate City Solicitor), Councilor Courchesne, Councilor Lamontagne, Councilor Brooks, Steve Frederick (City Engineer), Jeff Neece (DPW Superintendents), Elizabeth Soja (DPW Assistant) Councilor Tillotson, Lisa Sanders (Health Director)

The meeting was called to order at 6:46 PM

In compliance with the Open Meeting Law the Chairman asked if anyone in the audience was recording the meeting. Hearing none the meeting continued.

ITEM #1

ORDERED THAT the DPW and Health Department come before the Public Works Committee to give an update on sing installations and open See Click Fix issues.

Councilor Courchesne stated that orders that have been filed for signs are still not put up. He stated that constituents call and he doesn't have answers.

Jeff Neece stated we received all the information, went through all of the ordinances and catagorize them into an open pile. There are varied reasons why these are not complete; either approved by State or some regulatory reasons that Engineering doesn't agree with what is proposed and some of these weren't voted on or approved.

Jeff Neece proceeded to read the orders and ordinances.

Steve Fredericks stated that he doesn't understand the impact that these "Go Slow Children" signs have.

Councilor Krampits stated that he has received good feedback that these signs do slow people down. He stated it's only to raise awareness because it's not an ordinance.

Councilor Brooks stated what mechanism exists within this See Click Fix system that would allow for that conversation to be had.

Councilor Krampits stated we are trying to have a better process when we're filing signs so they don't get hung up on regulation problems.

Jeff Neece stated that the recommendation has been made before and it's a good change in what we do now. He stated we should have DPW sub-committee meetings prior to the ordinance.

Councilor Tillotson stated it will have to go to the DPW committee for determination then to the ordinance committee and this will delay everything. He stated the problem is for some reason the signs aren't getting put up in a timely fashion and if that's the case you can send a list back to the ordinance committee and I'll find out what's holding them up.

Councilor Courchesne stated that the "Go Slow Children" signs will give a heightened awareness of your surroundings. He stated that it also helps with speed control.

Steve Fredericks stated how do you determine if this street has more children than another street.

Councilor Laflamme stated that he is in favor with the "Go Slow Children" signs.

Councilor Laflamme stated that the DPW should send reports once a month to update the City Council of what isn't completed and why. He stated that we have to be able to have an answer for the residents.

Councilor Shane stated is there something that the developer of the program could put in the platform that could just shoot an auto reply that it has been received and you will get a response in a certain time frame. He stated it would be more user friendly.

Monthly report from DPW to Council Office with outstanding sign orders. Also for other outstanding issues, they will also contact the Council Office as well with an update.

Councilor Laflamme motion to approve – Councilor Brooks 2nd the motion – motion passed

Committee vote **5 – 0 favorable.**

ITEM #2

Minutes – October 11, 2016 – Motion made by Councilor Laflamme to approve – Councilor Brooks 2nd the motion . Motion passed.

Meeting adjourned at 8:25 PM

Canton, MA - Solar Farm Ordinance

9.7 LARGE SCALE GROUND MOUNTED SOLAR PHOTOVOLTAIC INSTALLTION OVERLAY DISTRICT (SPOD)

9.7.1 Purpose. The purpose of this Large-Scale Ground-Mounted Solar Photovoltaic Installation Overlay District (SPOD) is to promote the creation of new large-scale ground-mounted solar photovoltaic installations by providing standards for the placement, design, construction, operation, monitoring, modification and removal of such installations that address public safety, minimize impacts on scenic, natural and historic resources and to provide adequate financial assurance for the eventual decommissioning of such installations. The provisions set forth in this section shall apply to the construction, operation, and/or repair of large-scale ground-mounted solar photovoltaic installations.

9.7.2 Overlay District. The SPOD shall be construed as an overlay district. This district may be applied as an overlay to any parcel of land which has been designated by a town meeting vote. All requirements of the underlying zoning district(s) shall remain in full force and effect, except where the requirements of the SPOD are less restrictive or provide for uses or structures not otherwise available in the underlying district(s). In such cases the requirements of the SPOD shall supersede the underlying zoning regulations.

9.7.3 Applicability. This Section 9.7 applies to large-scale ground-mounted solar photovoltaic installations proposed to be constructed after the effective date of this section. This Section 9.7 also pertains to physical modifications that materially alter the type, configuration, or size of these installations or related equipment.

9.7.4 Expedited Permitting. A site plan shall be submitted in accordance with the requirements of Section 10.5 of this Bylaw. In order to comply with the provisions of Massachusetts General Law Chapter 25A, Section 10(c) "the Green Communities Act," site plan review shall be expedited and no decision shall be rendered so as to preclude the issuance of a building permit more than one (1) year after the date of application.

9.7.5 Definitions. See Section 11.

9.7.6 General Requirements for All Large-Scale Ground-Mounted Solar Power Generation Installations. The following requirements are common to all solar photovoltaic installations to be sited in designated locations. The Site Plan Review Authority may waive documentary requirements as it deems appropriate.

1. **Compliance with Laws, Ordinances and Regulations.** The construction and operation of all large-scale ground-mounted solar photovoltaic installations shall be consistent with all applicable local, state and federal requirements, including but not limited to all applicable safety, construction, electrical, and communications

requirements. All buildings and fixtures forming part of a solar photovoltaic installation shall be constructed in accordance with all current and applicable State Building Codes.

2. Building Permit and Building Inspection. No large-scale ground-mounted solar photovoltaic installation shall be constructed, installed or modified as provided in this Section without first obtaining a building permit.

3. Fees. The application for a building permit for a large-scale ground-mounted solar photovoltaic installation must be accompanied by the fee required for a building permit. The Planning Board or designated government body may adopt reasonable administrative fees and technical review fees that are commensurate for the said project.

4. Site Plan Review. Ground-mounted large scale solar photovoltaic installations with 250 kW or larger of rated nameplate capacity shall undergo site plan review by the Site Plan Review Authority pursuant to Section 10.5 of this Zoning Bylaw prior to construction, installation or modification as provided in this section.

5. General. All plans and maps shall be prepared, stamped and signed by a Professional Engineer licensed to practice in Massachusetts.

6. Required Documents. Pursuant to the site plan review process and in addition to documents otherwise required pursuant to Section 10.5 of this Zoning Bylaw, the project proponent shall provide the following documents:

(a) A site plan showing:

- i. Property lines and physical features, including roads, for the project site;
- ii. Proposed changes to the landscape of the site, grading, vegetation clearing and planting, exterior lighting, screening vegetation or structures;
- iii. Blueprints or drawings of the solar photovoltaic installation signed by a Professional Engineer licensed to practice in the Commonwealth of Massachusetts showing the proposed layout of the system and any potential shading from nearby structures;
- iv. One (1) or three (3) line electrical diagram detailing the solar photovoltaic installation, associated components, and electrical interconnection methods, with all National Electrical Code compliant disconnects and overcurrent devices;

- v. Documentation of the major system components to be used, including the PV panels, mounting system, and inverter;
 - vi. Name, address, and contact information for proposed system installer;
 - vii. Name, address, phone number and signature of the project proponent, as well as all co-proponents or property owners, if any;
 - viii. The name, contact information and signature of any agents representing the project proponent; and
- (b) Documentation of actual or prospective access and control of the project site;
 - (c) An operation and maintenance plan;
 - (d) Zoning district designation for the parcel(s) of land comprising the project site (submission of a copy of a zoning map with the parcel(s) identified is suitable for this purpose);
 - (e) Proof of liability insurance; and
 - (f) Description of financial surety that satisfies Section 9.7.10.3.

7. Site Control. The project proponent shall submit documentation of actual or prospective access and control of the project site sufficient to allow for construction and operation of the proposed solar photovoltaic installation.

8. Operation & Maintenance Plan. The project proponent shall submit a plan for the operation and maintenance of the large-scale ground-mounted solar photovoltaic installation, which shall include measures for maintaining safe access to the installation, storm water controls, as well as general procedures for operational maintenance of the installation.

9. Utility Notification. No large-scale ground-mounted solar photovoltaic installation shall be constructed until evidence has been given to the Site Plan Review Authority that the utility company that operates the electrical grid where the installation is to be located has been informed of the solar photovoltaic installation owner or operator's intent to install an interconnected customer-owned generator. Off-grid systems shall be exempt from this requirement.

10. Dimension and Density Requirements.

- (a) Setbacks: For large scale ground mounted solar Photovoltaic installations, front, side and rear setbacks shall be as follows:

1. Front yard: The front yard depth shall be at least 25 feet; provided, however, that where the lot abuts a Conservation-Recreation, Residential district or a lot containing a building used primarily for residential purposes, the front yard shall not be less than sixty (60) feet.

2. Side yard. Each side yard shall have a depth at least fifteen (15) feet unless side yard abuts a railroad right-of-way; provided, however, that where the lot abuts a Conservation-Recreation, Residential district or a lot containing a building used primarily for residential purposes, the side yard shall not be less than fifty (50) feet.

3. Rear yard. The rear yard depth shall be at least twenty-five (25) feet unless the rear yard abuts a railroad right-of-way; provided, however, that where the lot abuts a Conservation-Recreation, Residential district or a lot containing a building used primarily for residential purposes, the rear yard shall not be less than fifty (50) feet.

The Board of Appeals may waive one or more setback requirements upon a demonstration by the applicant that such waiver will further the goals of this Section 9.7, provided, however, that no such waiver shall allow a large-scale ground-mounted solar photovoltaic installation within fifty (50) feet of a residential property line or within twenty (20) feet of a street.

- (b) Height Regulations. No structure shall be constructed to exceed twelve (12) feet in maximum height in this Large-Scale Ground-Mounted Solar Photovoltaic Installation Overlay District (SPOD).
- (c) Appurtenant Structures. All appurtenant structures to large-scale ground-mounted solar photovoltaic installations shall be subject to reasonable regulations concerning the bulk and height of structures, lot area, setbacks (*see* 9.7.6.10.1), open space, parking and building coverage requirements. All such appurtenant structures, including but not limited to, equipment shelters, storage facilities, transformers, and substations, shall be architecturally compatible with each other. Whenever reasonable, structures should be shaded from view by vegetation and/or joined or clustered to avoid adverse visual impacts.

9.7.7 Design Standards.

1. **Lighting.** Lighting of solar photovoltaic installations shall be consistent with local, state and federal law. Lighting of other parts of the installation, such as appurtenant structures, shall be limited to that required for safety and operational purposes, and shall be reasonably shielded from abutting properties. Where feasible, lighting of the solar photovoltaic installation shall be directed downward and shall incorporate full cut-off fixtures to reduce light pollution.
2. **Signage.** Signs on large-scale ground-mounted solar photovoltaic installations shall comply with Section 6.3 of this Zoning Bylaw. A sign consistent with such Section 6.3 shall be required to identify the owner and provide a twenty-four (24) hour emergency contact phone number. Solar photovoltaic installations shall not be used for displaying any advertising except for reasonable identification of the manufacturer or operator of the solar photovoltaic installation.
3. **Utility Connections.** Reasonable efforts, as determined by the Site Plan Review Authority, shall be made to place all utility connections from the solar photovoltaic installation underground, depending on appropriate soil conditions, shape, and topography of the site and any requirements of the utility provider. Electrical transformers for utility interconnections may be above ground if required by the utility provider.

9.7.8 Safety and Environmental Standards.

1. **Emergency Services.** The large-scale ground-mounted solar photovoltaic installation owner or operator shall provide a copy of the project summary, electrical schematic, and site plan to the Fire Chief. Upon request the owner or operator shall cooperate with local emergency services in developing an emergency response plan. All means of shutting down the solar photovoltaic installation shall be clearly marked. The owner or operator shall identify a responsible person for public inquiries throughout the life of the installation.
2. **Land Clearing, Soil Erosion and Habitat Impacts.** Clearing of natural vegetation shall be limited to what is necessary for the construction, operation and maintenance of the large-scale ground-mounted solar photovoltaic installation or otherwise prescribed by applicable laws, regulations, and Bylaws.

9.7.9 Monitoring and Maintenance.

1. **Solar Photovoltaic Installation Conditions.** The large-scale ground-mounted solar photovoltaic installation owner or operator shall maintain the facility in good condition. Maintenance shall include, but not be limited to, painting,

structural repairs, and integrity of security measures. Site access shall be maintained to a level acceptable to the Fire Chief and Emergency Medical Services. The owner or operator shall be responsible for the cost of maintaining the solar photovoltaic installation and any access road(s), unless accepted as a public way.

2. Modifications. All material modification to a solar photovoltaic installation made after issuance of the required building permit shall require approval by the Site Plan Review Authority.

9.7.10 Abandonment and Decommissioning.

1. Removal Requirements. Any large-scale ground-mounted solar photovoltaic installation, which has reached the end of its useful life or has been abandoned consistent with Section 9.7.10.2 of this bylaw shall be removed. The owner or operator shall physically remove the installation no more than one hundred fifty (150) days after the date of discontinued operations. The owner or operator shall notify the Site Plan Review Authority by certified mail of the proposed date of discontinued operations and plans for removal. Decommissioning shall consist of:

- (a) Physical removal of all large-scale ground-mounted solar photovoltaic installations, structures, equipment, security barriers and transmission lines from the site.
- (b) Disposal of all solid and hazardous waste in accordance with local, state, and federal waste disposal regulations.
- (c) Stabilization or re-vegetation of the site as necessary to minimize erosion. The Site Plan Review Authority may allow the owner or operator to leave landscaping or designated below-grade foundations in order to minimize erosion and disruption to vegetation.

2. Abandonment. Absent notice of a proposed date of decommissioning or written notice of extenuating circumstances, the solar photovoltaic installation shall be considered abandoned when it fails to operate for more than one year without the written consent of the Site Plan Review Authority. If the owner or operator of the large-scale ground-mounted solar photovoltaic installation fails to remove the installation in accordance with the requirements of this section within one hundred fifty (150) days of abandonment or the proposed date of decommissioning, the Town may enter the property and physically remove the installation.

3. Financial Surety. Proponents of large-scale ground-mounted solar photovoltaic projects shall provide a form of surety, either through escrow

account, bond or otherwise, to cover the cost of removal in the event the Town must remove the installation and remediate the landscape, in an amount and form determined to be reasonable by the Site Plan Review Authority, but in no event to exceed more than one hundred twenty five (125%) percent of the cost of removal and compliance with the additional requirements set forth herein, as determined by the project proponent. Such surety will not be required for municipally or state owned facilities. The project proponent shall submit a fully inclusive estimate of the costs associated with removal, prepared by a qualified engineer. The amount shall include a mechanism for calculating increased removal costs due to inflation.

9.8 CANTON CENTER ECONOMIC OPPORTUNITY DISTRICT (CCEOD)

9.8.1 Sub-districts. The CCEOD is divided into three separate and distinct sub-districts of Canton Center as follows:

1. **Priority Revitalization Area "A":** That area of Canton Center that runs (1) along Washington Street from Neponset Street to Sherman Street, a distance of approximately two thousand (2000) linear feet and (2) that area zoned "Industrial" that runs along Pequit Street in the vicinity of Washington Street, to the Northern border of the District.
2. **Priority Revitalization Area "B":** That area of Canton Center that runs (1) along Washington Street from Sherman Street to Lewis Street, a distance of approximately one thousand (1000) linear feet, but excluding (2) that area of land designated as "Industrial" that runs along Pequit Street in the vicinity of Washington Street to the Northern border of the District.
3. **Priority Revitalization Area "C":** That area of Canton Center that runs along Revere Street from the boundary of Priority Revitalization "A" to the intersection of the railroad bridge/tracks and Revere Street, a distance approximately 2,300 linear feet.
4. Priority Revitalization Areas "A" and "B" are shown on a map entitled "Canton Center Economic Opportunity District (Priority Revitalization Area "A" and Priority Revitalization "B") prepared by the Canton Planning Department and dated December 20, 2004.
5. Priority Revitalization Area "C" is shown on map entitled "Canton Center Economic Opportunity District (Priority Revitalization Area "C") prepared by Vanasse Hangen Brustlin, Inc. and dated January 5, 2015.
6. The maps described immediately above are hereby incorporated by
